

CUPFEST!

VIRTUAL MINECRAFT CONCERT
FOR MUTUAL AID!

HOW TO ATTEND THE FESTIVAL IN MINECRAFT

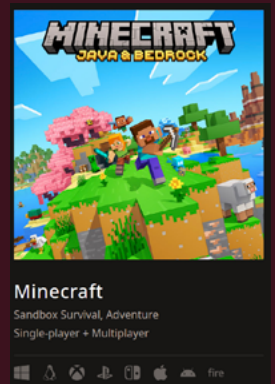

Attending the festival in Minecraft (or watching on Twitch.TV/BDolanOfficial is free however, we'd love it if you paid the price of admission as a donation to Cupburger [here](#) of £15 / \$20 or whatever you can afford.

You can only attend the festival in Minecraft on PC, sorry console folk.

1. If you don't own Minecraft on PC:
Go to <https://www.minecraft.net/>
Select 'buy game'

You need the version pictured to the right ->

The base game is about \$30.

2. You should get instructions to download the launcher when you buy the game, but if not you can download it here:

<https://www.minecraft.net/en-us/download>

(you could use any launcher but the safest easiest way is to just download the launcher from the official Minecraft website)

3. Once that's all setup and downloaded, select **Java edition** on the official launcher
4. Go to **Installations** tab. Click on **new installation**. Give the server a name eg Cupfest. Then on the drop-down menu scroll down to release **1.21.11** and hit 'create'
4. When you go back to the **Play** tab, the bottom left drop down should now show the new server and release as **1.21.11**
5. Hit **play**. Then go into **Multiplayer > add server >** give it a name eg Cupfest then in Server Address paste in **NetherRap.playat.ch** and click Done
6. Click on the server and it will open. Say 'yes' to download the custom resource pack – this means the festival site will look as intended by its builders.
7. And you're in! You won't be able to access the festival site until the event, but you can peek through the security fence to see what our amazing Minecraft builders Vector, Heather and Funkle have been up to.

If you can't join in-game, you can still watch the event via our interactive stream on [Twitch.TV/BDolanOfficial](https://www.twitch.tv/bdolanofficial)

SEE YOU THERE!
